

is for Accessories

When it comes to accessories, no one can match Reinflex's extensive stock of OEM grade adapters, ball valves, fittings, pressure gauges, and quick disconnects. Many of our adapters are plated in stainless steel and all of our accessories' male ends are chamfered. You can also count on our excellent customer service staff to see to it that all of your accessories are delivered quickly each and every time.

OUR COMPLETE ACCESSORIES LINE INCLUDES:

- High Pressure Adapters
- Ball Valves
- Hose Jacketing
- Pressure Gauges
- Quick Disconnects

Adapters

When you are using a Reinflex high pressure hose, you want to be sure that any connections you make are equally reliable. That's where Reinflex high pressure adapters come in. Available in both plated steel and stainless steel, Reinflex adapters come in a variety of fitments and insure leak free connections and optimal flow. For added convenience and value, we even sell a pre-boxed assortment containing 17 of the most popular adapters in the industry.

Ball Valves

If you need ball valves that offer the same quality as the Reinflex hoses in your applications and installations, look no further. The male and female ball valve assemblies shown below work with paint, petroleum-based hydraulic fluids, fuel oil, and air.

Reinflex's male-thread ball valves use carbon steel for the body, hard chrome plated carbon steel for the ball, and zinc plated steel for the stem. Connections are male NPT, full bore, and the valves are rated to a working pressure of 7,500 PSI. Our female-thread ball valves have carbon steel or stainless steel bodies, hard chrome plated carbon steel or stainless steel balls, zinc plated steel or stainless steel stems, and Viton or Teflon seals. Connection is female NPT, full bore. For working pressures, please see chart below.

If you require other ball valve construction types, talk to a CRP service specialist who will be happy to discuss the other options available.

Hose Jacketing

Reinflax is proud to offer Expando PT hose jacketing. Expando PT is a self-fitting protective oversleeve, with expandable braid construction, designed to offer maximum resistance to abrasion and impact damage. Its open weave construction allows easy identification of contents. An additional advantage offered by these lightweight oversleeves is that each size fits several diameters.

Expando PT is easy to apply, has an operating temperature range from -40°F to +125°F, and is up to 4 times more abrasion resistant than competitive products. Additional features like flexibility, choice of colors, and resistance to most industrial fluids round out Expando PT's advantages.

HOSE JACKETING

SELF-FITTING PROTECTIVE OVERSLEEVE

PART # (COLOR)	SLEEVE SIZE	EXPANDED SIZE	FEET PER SPOOL	WEIGHT PER 100 FT. (LBS.)

*Always specify hose jacket color when ordering.

Pressure Gauge

Reinflex's Pressure Gauge line up comes in a variety of pressure ranges, dial and connection sizes, and mounting configurations. For added durability and accuracy in more extreme environments, glycerine filled gauges are also available.

Quick Disconnects

The fastest and simplest way to connect and disconnect hoses are these quick couplers. For use in spray applications, the working pressure rating for the 1/4" coupler is 5,000 psi; for the 3/8" option, 4,000 psi; and for the 1/2", 4,000 psi. Viton O-rings allow use with most paints and solvents. We can also source non-standard couplers, call for details.
